

DEBASHIS DAS

IT Operations Engineer | Systems Administration – VMware, Windows & Azure | OT Environments

Bengaluru, India | +91-8972313569 | Dasdebashis2010@gmail.com | [linkedin.com/in/i-am-debashis-das](https://www.linkedin.com/in/i-am-debashis-das)

PROFILE SUMMARY

- Result-oriented IT Operations professional with 8+ years of experience in Systems Administration (VMware, Windows Server, and Azure) across Operational Technology (OT) environments and premier technical support/troubleshooting.
- Skilled in remote support, and in installing and configuring server operating systems, application software, antivirus solutions, and hardware.
- Certified in Cybersecurity (CC) and Certified Information Systems Security Professional (CISSP), with additional ITIL v4 and Microsoft Azure Fundamentals certifications.

SKILL SET

Functional

- Providing high-end technical support across enterprise servers, ensuring high customer satisfaction through prompt issue resolution.
- Maintaining enterprise servers, operating systems, clusters, storage, file systems, databases, and application servers.
- Addressing performance bottlenecks and ensuring maximum network uptime.
- Liaising with clients on complex system issues and operational problems.
- Managing user accounts, server maintenance, mail servers, ePO servers, and backup servers.
- Overseeing disk space allocation, user profile creation, and user rights management.

Technical

- Operating Systems: Windows Server OS
- Tools: VMware vSphere & vCenter, Hyper-V, Windows Server, McAfee ePO, Symantec, Veeam Backup & Replication, WSUS, SolarWinds, Serv-U, Citrix
- VMware vSphere, vCenter Operations Manager, vSphere Update Manager, vStorage, vNetworking, vCenter Heartbeat, HA, DRS, and Host Profiles.
- VMware Virtual Center administration and ESXi installation, configuration, and administration.
- Virtual networking: virtual switches, VMkernel ports, high availability, clustering, vMotion, and Storage vMotion.
- Expert in Active Directory administration and automation within Windows Active Directory.
- Strong scripting capabilities for operational automation.
- Certificate management, DNS administration, and DHCP management.
- Veeam Backup & Replication, enterprise patching via WSUS, and vulnerability management.
- Antivirus management using McAfee and Symantec.
- ITIL process management: Change, Release, Request, Knowledge Base, and SOP preparation.
- Delivering IaaS solutions across HP/Dell hardware, hypervisors (ESXi, Hyper-V, Azure Cloud), and Windows OS.
- Vulnerability management and remediation tracking across enterprise servers and endpoints.
- Incident management: identification, triage, escalation, and resolution of operational and security incidents within SLA.
- IT asset and server lifecycle management, from provisioning and deployment through decommissioning.
- Disaster Recovery (DR) and Business Continuity Planning (BCP), including backup strategy, failover testing, and recovery documentation.

Other Skills

- Comprehensive understanding of ITIL, SLA management, and change and vendor management.
- Effective communicator and shift leader with strong problem-solving and continuous-learning skills.
- Proficient in managerial and cross-functional coordination tasks.
- End-to-end IT operations management, ensuring seamless service delivery across infrastructure, applications, and support functions.
- Team leadership and management, overseeing an operations team to ensure round-the-clock coverage, consistent service delivery, and staff development.

CERTIFICATIONS

- Certified in Cybersecurity (CC) – ISC2
- Certified Information Systems Security Professional (CISSP) – ISC2
- Microsoft Certified: Azure Fundamentals (AZ-900)
- ITIL V4 Foundation Certification – Axelos
- AWS Cloud Fundamentals – Coursera
- Industrial Control Systems Cybersecurity (ICS 300)

PROFESSIONAL EXPERIENCE

Shell India Markets Private Limited, Bengaluru

July 2021 – Present

OT Operations Engineer

- Provide end-to-end support for internally managed infrastructure within the Process Control Network, spanning Wintel servers, VMware hypervisors, and Azure cloud infrastructure (Azure VM provisioning).
- Manage storage and backup solutions across VSAN, SAN, NAS, and HP StoreEasy platforms.
- Set up and administer on-premises Active Directory domain services, Azure AD, new GPOs, and AD-integrated DNS services.
- Deliver storage solutions across Azure, HP StoreEasy, SAN, and NAS.
- Migrate VMware vSphere servers to Azure using Azure Migrate, and migrate servers to AWS.
- Led migration of standalone servers to a newly deployed virtualized infrastructure for PCD and Wells IT, including HP EL4000 hardware, ESXi, VSAN, Windows servers, and SQL databases.
- Manage IRM controls, user access management, security controls, and WSUS-based patch controls.
- Administer Vasco and PingID multi-factor authentication servers, and Password Vault/PAM solutions.
- Oversee antivirus management (McAfee, Symantec), Windows Server patching, and vulnerability management.
- Lead incident management for infrastructure and security events, including triage, escalation, root-cause analysis, and resolution within SLA.
- Own Disaster Recovery and Business Continuity Planning for critical infrastructure, including backup strategy, DR failover testing, and recovery runbook documentation.
- Manage IT asset and server lifecycle, from provisioning and configuration through end-of-life decommissioning.
- Drive ITIL processes: Change, Release, Request, Knowledge Base, and SOP preparation.
- Manage server backup via Veeam Backup & Replication with integration to cloud storage solutions such as Azure Blob Storage.
- Maintain asset inventory and live network monitoring using SolarWinds SAM/NPM and Kiwi Syslog servers.
- Build reliable, market-standard IaaS solutions using HP Blade servers, VMware hypervisor, Windows-based application/web servers, Thinfinity, and SolarWinds monitoring.
- Implement operational automation using PowerShell as part of continuous improvement initiatives.
- Mentor team members, provide technical guidance for timely issue resolution, and deliver training.

Shell Netherlands, Amsterdam (On-site)

April 2023 – January 2024

OT Operations Engineer

- Delivered end-to-end system support across the Shell R&D Lab, ensuring smooth operation and prompt issue resolution.
- Monitored and maintained system documentation, including scripting-based records, for transparency and ease of troubleshooting.
- Managed and reviewed firewall rules, regularly testing effectiveness to strengthen network security and compliance.
- Maintained enterprise antivirus solutions, including timely updates to signatures, agents, and ePO.
- Managed automated backup and restoration processes via Veeam as part of the site's DR/BCP strategy, keeping Veeam and its agents current.
- Handled incident management for R&D Lab systems, coordinating triage and resolution to minimize downtime.
- Administered system updates through WSUS to maintain security and patch compliance.
- Administered VMware infrastructure supporting virtual machine services and resource optimization.
- Managed Active Directory security through domain enrollment, group policy application, and periodic configuration pushes.
- Coordinated communication with distributed systems and managed patch deployment for consistency and security.

- Oversaw storage and data center resources to ensure availability, performance, and scalability.
- Gathered user requirements for R&D systems and maintained detailed engagement documentation.
- Managed and regulated third-party network access in line with security policies and protocols.

Infosys Limited, Bengaluru — Client: Baker Hughes (Oil & Gas)

January 2018 – July 2021

System Administrator (Systems Engineer → Senior Systems Engineer → Technology Analyst)

VMware Administration

- Installed, configured, and administered ESXi servers and vCenter Server, including ESXi patching.
- Configured and managed virtual servers via vCenter 6.x/8.x and provisioned new servers per requirements.
- Created and configured clusters with HA, DRS, and FT; configured datastores for VMs and ESXi hosts.
- Performed vMotion, Storage vMotion, VM reconfiguration, snapshots, cloning, and template creation.
- Actively participated in P2V and V2V server migrations, and in data center migration projects.
- Generated performance and inventory reports using RVTools; performed VM resource reconfiguration (vCPU, RAM, HDD, NIC).

Windows Administration

- Troubleshoot OS and hardware issues; managed AD, DNS, MS Clustering, DHCP, and file/print servers.
- Installed and managed Hyper-V servers and VMs; deployed servers using Windows Lite Touch gold images.
- Migrated VMs between Hyper-V hosts and handled change requests, including vendor coordination for hardware replacement.
- Managed file servers, folder permissions, and file screening; administered AD user and service accounts.
- Managed server admin credentials via Password Vault, and led monthly Windows Server patching.
- Troubleshoot Dell server hardware issues, including DRAC remediation, firmware/BIOS updates, and RAID configuration.
- Performed disk space consolidation on Hyper-V virtual infrastructure and provisioned VMs for end users.
- Administered SCOM, including reporting, maintenance-mode management, and RMS server enrollment.

EDUCATION

- B.Tech, Maulana Abul Kalam Azad University of Technology (W.B.U.T.) — CGPA 8.77, 2017

AWARDS & RECOGNITION

- Winner, Infosys Best Employee Insta Award (twice).
- Recognized twice by the Shell PCD Team for excellent support and service.
- Received the Shell Special Recognition Award three times, including a cash award of INR 1.5L.

PERSONAL DETAILS

Date of Birth: 03 May 1993 | Nationality: Indian | Languages: English, Hindi, Bengali, Odia | Location: Bengaluru, India
